CAREER OBJECTIVE

Backend-focused engineer experienced in building multi-tiered, distributed systems with Java, Python, and MySQL. Skilled in object-oriented design, RESTful and microservice architecture, and relational database design, backed by data structures, algorithms, and complexity-analysis fundamentals. Comfortable learning fast and working through ambiguity in agile, fast-paced development environments.

EDUCATION

Bachelor of Technology, Artificial Intelligence and Data Science	2023 – 2027
M. Kumarasamy College of Engineering, Karur, India	CGAP : 7.84

TECHNICAL SKILLS

CS Fundamentals: Object-Oriented Design, Data Structures & Algorithms, Complexity Analysis, Operating Systems, RDBMS

Languages: Java, Python, SQL

Backend & Distributed Systems: Spring Boot, REST APIs, Microservices, MVC Architecture, Multi-Tier Architecture, JWT & Spring Security

Databases: MySQL, MongoDB

Web: HTML5, CSS3, JavaScript, Bootstrap 5

Tools & Testing: Git/GitHub, Maven, Postman, Docker, IntelliJ IDEA

PROJECTS

Aegis-X — AI-Assisted Cross-Border Payment Compliance & Settlement Orchestration Responder

Java 21 (Spring Boot), PostgreSQL, Spring AI, JWT, Razorpay, Docker

- Built a modular Spring Boot compliance system managing payment transactions, evidence collection, AI analysis, policy evaluation, and settlement workflows.
- Implemented a deterministic Java Policy Engine with Spring AI advisory reasoning, JWT-based RBAC, transaction state management, optimistic locking, and audit logging.
- Integrated HMAC-SHA256 verified Razorpay webhooks with idempotent event handling, REST APIs, transaction filtering, pagination, and automated testing.

Task Management System

PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap 5

- Built a role-based task-management platform for a college workflow, with distinct dashboards and permissions for Chairman, HOD, Faculty, and Staff covering task creation, assignment, and status updates.
- Designed the MySQL schema and backend logic for task, deadline, and meeting-action data, and a responsive Bootstrap 5 UI, enabling centralized progress monitoring and reporting.

INTERNSHIP EXPERIENCE

Full-Stack Development Trainee — Technology Innovation Hub, MKCE *Aug 2025 – Apr 2026*

- Contributed to backend development, database operations, and REST API integration for a centralized task-management and college ERP platform using PHP and MySQL.
- Developed backend modules for task assignment, delegation, status tracking, deadlines, escalations, and role-based workflows.
- Collaborated on application development and database-driven features while gaining hands-on experience in backend architecture, API development, and software engineering practices.

ACHIEVEMENTS

- IEEE Publication — Nov 2025:** “A Predictive ERP Framework for the Textile Industry: An Agile and Machine Learning Approach” — applied agile methodology and machine learning techniques to enterprise resource planning.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- Java (Basic) – HackerRank
- SQL and Relational Databases 101 – Cognitive Class
- The Complete JavaScript Developer – Udemy
